Features

AE official website

Thorough repair and testing

Active and discontinued units

Six-month, whole-box warranty, plus extended warranty options

Enhancements available

Quick delivery

24 x 7 x 365 technical support

Advanced Energy's used power and flow equipment provides an easy, quick, and affordable solution. Simply browse our list of real-time certified used equipment, and send us your request. Our entire inventory is serviced with AE-qualified parts and undergoes thorough functional testing and inspection. Each unit includes a six-month, whole-box warranty and typically ships next business day.

Choose from an Extensive Inventory of Used Power and Flow Equipment

Did you know the same company you've trusted nearly three decades for leading power and flow products also sells used equipment? Whether you need a discontinued spare or an immediate drop-in replacement, Advanced Energy (AE) has an extensive used inventory available.

At www.aei.com/used—our only official site—you can view a real-time list of power supplies, matching networks, and MFCs, by product name, part number, and serial number. Because we own and manage our equipment, if the serial number is on the website, then the unit is available in our inventory. In addition to most the common equipment, we have in stock many sought-after units no longer manufactured. If you cannot find the unit you seek, AE can often convert an available unit to your requested part number.

What's more, because we perform functional testing at the time used equipment returns to the factory (rather than at the time of your order), expedited shipments are customary—in most cases, next business day.

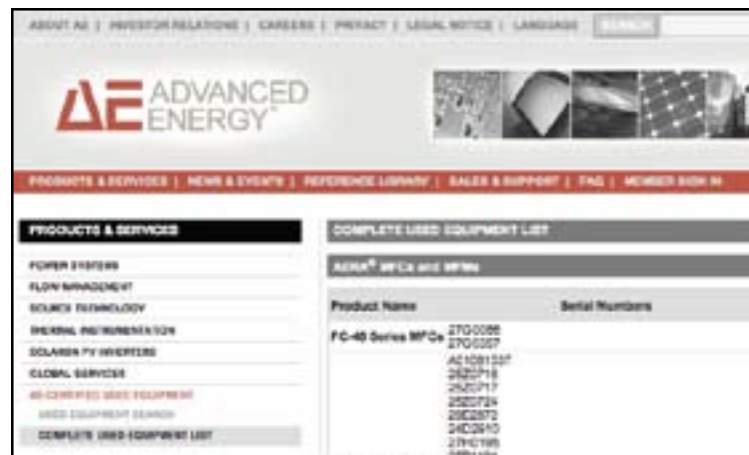

Figure 1: Accessing our web-based list of certified used equipment is simple. Log on to www.aei.com/used, browse through our real-time list of equipment, and send us your request.

Get the Best Price-for-Performance Equipment with the Highest-Quality Standards Only AE Can Offer

Before placing used equipment in inventory, we repair, test, inspect, and implement all necessary updates in our world-class global service centers. We use original AE-qualified parts and AE-exclusive test equipment and software to ensure the highest quality standards.

Our Global Service team supports all used equipment, even discontinued products. Each unit is backed by a six-month, whole-box warranty that you can extend up to eighteen months—regardless of the age of the unit. You can also take advantage of available enhancements and refurbishment kits to add feature sets, extend your product's lifetime, and increase product reliability. As always, we provide 24 x 7 x 365 technical support with knowledgeable and helpful assistance.

Whatever your situation may be, find the used equipment you need at www.aei.com/used, or e-mail us at technical.support@aei.com and we will be happy to research your request.
